Aurora Solar ASA - Annual Report 2025

1. Letter from the Chief Executive

Aurora Solar ASA is headquartered in Bergen, Norway, and employed 4,850 people at the end of the year. Our Chief Executive Officer, Priya Raghunathan, joined the company in 2021 and has led its expansion from a regional installer into a pan-European solar developer. This report covers the financial year ending 31 December 2025.

During 2025 we strengthened our installation partner network, opened two new training academies, and continued to invest in high-efficiency bifacial modules. Safety performance improved, with a lost-time injury rate of 0.8 per million hours worked.

2. Financial performance

Quarterly results improved steadily throughout the year, as summarised below.

Quarter	Revenue (USD M)	Net margin	New installations (MW)
Q1 2025	182.4	9.1%	410
Q2 2025	205.7	10.4%	455
Q3 2025	231.9	12.2%	502
Q4 2025	248.3	12.8%	540

Table 1: Quarterly financial results, 2025

3. Regional development

Regional expansion continued across all four operating markets. Growth was strongest where permitting reforms shortened project lead times. The distribution of installed capacity across regions is shown in Figure 1.

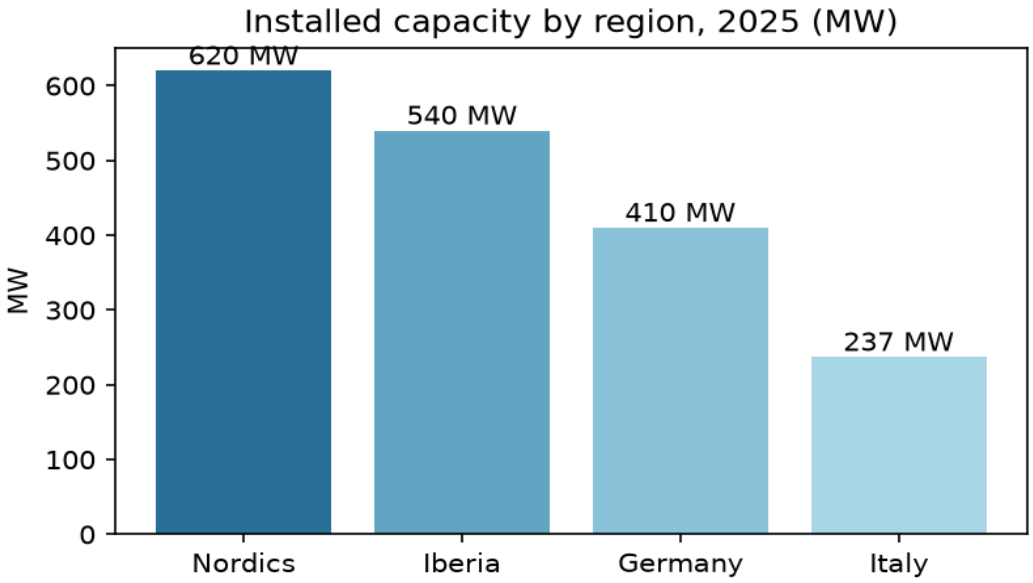

Figure 1: Installed capacity by region (MW), 2025

4. Revenue by segment

Our customer base spans households, businesses and grid-scale buyers (see Figure 2).

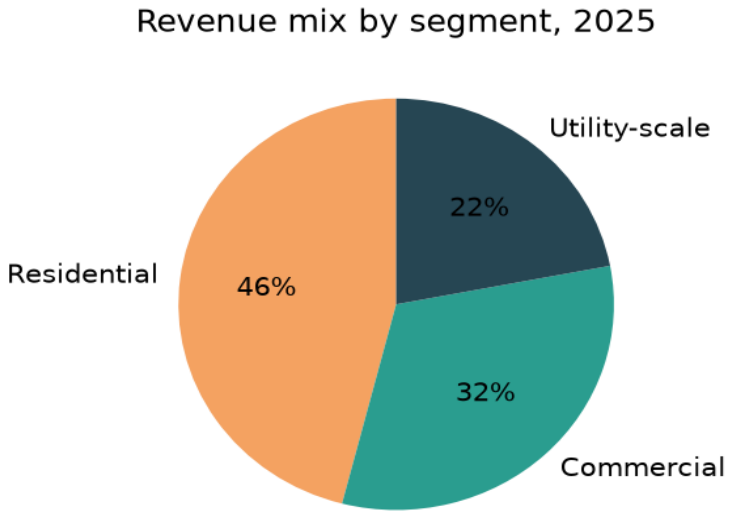

Figure 2: Revenue mix by customer segment

5. Technology

Module efficiency is a key driver of the levelised cost of energy. Figure 3 shows the average efficiency of modules deployed in our projects since 2019.

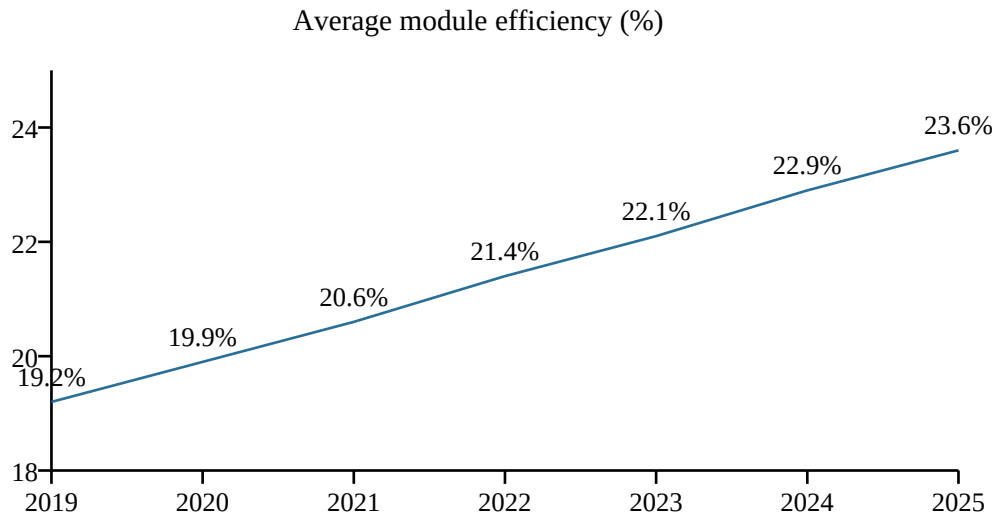

Figure 3: Average deployed module efficiency, 2019-2025

6. Outlook

For 2026, the board has set a target of 3.1 GW of cumulative installed capacity and plans to enter the Polish market in the second half of the year.
